Light teeth are made in the form of double curing and two layers of durable acrylic in different designs and colors. The size of the teeth is derived from the best tooth size in the world, which matches the natural human teeth and the appearance of the face. Light teeth don't change color over time, and this claim has been tested for years. LIGHT Dental has international standards and dental school approval. With years of hard work and experience, azindandan has brought health and wellness to customers.
