

**God and Contemporary Western Scientists:
Challenges and Clarifications**

Mehdi Golshani

**Al-Mustafa International
Translation and Publication Center**

Publisher's Forward

To begin and execute a research is like walking in the path of development and evolvement. When the seeds of the “questions” are planted, in the soil of the mind of the researcher, this phase initiates, and its end is culminated when the result and the outcome of knowledge and wisdom is gained.

Evidently, this end is a new chapter in itself, for growth, and announces beforehand this good news to humans. For the result of all those mental efforts will not only bring the blooming and flowering of talent and all kinds of Blessings to humans, but it also makes the mind of the researcher to ponder and shape new, more questions.

This will produce a great collection of growing plants and flowers for the seeking mind... Those “questions” are in fact, the seeds, which according to the necessities of Time and the strength of the researchers will grow and bloom by themselves. They will make Culture and Civilization to move forward.

In like manner, the increasing rate of transferring oneself from one place to another place and the decrease of the distances will make those seeds travel miles and miles, to faraway places, in order to install them inside the curious mind of other seekers. This will bring an amazing diversity and a novelty for another civilization...

It is true then, that the presence of knowledge and a good, capable management will help this project to develop itself and one has to admit indeed, that it has always played an important role...

Al-Mustafa International Publication and Translation Center, because of its global mission, and its special position among the Religious Schools and the colorful human diversity that it has developed inside itself, sees it as a moral duty to procure all the appropriate conditions for any research works, and takes its role in this matter, most seriously. To procure all kinds of necessary grounds, with an excellent management of all the existing possibilities and talents, and to care and protect all its researchers in religious fields; these are the most crucial responsibilities of the Department of Research in this International center.

We highly hope that by being attentive to all these autonomous scientific movements, and by fortifying all the existing motives, we shall be able to witness the blooming of the Religious Culture in every part of this wide world!

Contents

Preface	7
Chapter (1): Theism and Contemporary Western Scientists	9
Introduction	9
Belief in God among Contemporary Physicists	20
I) Atheist Scientists	20
II) Proponents of Religious Neutrality	26
III) Believers in God	27
Responses of Believers to Disbelievers	34
Summary and Conclusions	38
References	44
Chapter (2): Islamic Theological Doctrines And Modern Science Challenges	49
Introduction	49
1. Darwin's Theory of Evolution	51
2. The Problem of Life and Spirit	53
3. Creation of the Universe	57
4. Creation Out of Nothing	62
5. Does the Universe have a Purpose?	65
6. The Problem of Miracles	71
References	75
Chapter (3): Modern Design Argument	79
Introduction	79
1. Fine Tuning of Fundamental Constants of Nature	80
2. Anthropic Principle	82
3. The History of Fine tuning in Science	82
4. Constants of Nature and their Fine Tuning	84
5. Different Readings of the Anthropic Principle	85
i) Weak Anthropic Principle (WAP)	85
ii) Strong Anthropic Principle	86

6 Challenges and Clarifications

6. Explanation of the FineTuning of Fundamental Constants	86
6-1) Explanation Through a Deeper Theory	87
i) Theory of Everything	87
ii) Physicists' View About Gödel's Theorem	88
iii) Conclusion	90
6-2) The Explanation of Fine Tuning Through Multiverse	90
i) Cyclic Universes	91
iii) Actualization of All Mathematical Possibilities	92
iv) Susskind's Cosmic Landscape	93
6-3) Some Clarifications Concerning Multiverse	94
7. Summary of Explanations of FineTuning	97
Summary	101
References	102
